Unconventional percussion  
and tap-dance show

Dossier

## THE SHOW

A fresh and new performance which has no boundaries, thanks to its universal language: rhythm!

Live percussion, tap-dance and physical theatre are the ingredients that make this representation so unique and suitable for any kind of audience, no matter their age, language or culture.

A wood board, plastic buckets, saucepans, ringbells and other unusual objects will turn into real music instruments and will play a symphony that will be difficult to resist

Accompanied by his inseparable tap shoes and drum sticks, the eccentric Mr. Ritmo will create a very special concert: an unstoppable crescendo of music and gags that will entertain the whole family!

# Mr. Ritmo

Extravagant, elegant and very eccentric: Mr. Ritmo is the character created by Domenico Ciano, during his studies at Performing Art University Torino.

A surprising hybrid between a percussionist, a tap dancer and an orchestra conductor.

Born and raised in the very far “Drumland” , he mainly communicates through percussive sounds.

This will create a unique serie of funny situations and hilarious gags.

His biggest dream?

To gather the “Lost & Found Orchestra” and to perform together the most breathe taking concert of all time!
